
Stages of pregnancy

The diagrams below show how a baby develops during the course of pregnancy.

Draw a time line in your book. It should be 20 cm long, with 1 cm representing 2 weeks.

Cut out these pictures and glue them onto your time line in the correct place.

foetus about 10 weeks old
(half life size)

foetus about 21 weeks old
(half life size)

foetus about 38–40 weeks old
(quarter life size)

foetus about 30 weeks old
(quarter life size)

foetus about 15 weeks old
(half life size)

foetus at 6 weeks old
(about half life size)
